# WELCOME TO FLYPOOL

## Carpooling to or from an airport

Public transportation is good but expensive and not always suitable for luggage or timetables are awkward.

Traditional carpooling doesn't always meet the needs in terms of routes, especially since airports are often located outside of cities.

➡ is better to have a reliable vehicle, but parking is expensive, so it's better to share a car!

## HOW DOES IT WORK ?

- A mobile application + a multilingual website
- Plans your trips in advance or find a carpool at the last minute
- Submit a proposal as a driver detailing your route and availability
- Search according to your criteria and get in touch with other travelers

- All 100% free for users
